

- Advanced filtration and contaminant adsorption system reduces sediment, rust, chlorine taste and odor, lead and cysts that may be present in the water supply
- Sanitary Quick Change filter cartridges for easy installation and service – no spills, no mess
- Compact, integral design eliminates costly plumbing components and fittings for an economical installation and long-term, hassle-free maintenance
- 1/4 turn quick-change filter design eliminates risk of injury and physical challenges associated with undersink appliance maintenance
- NSF Certified and listed for contaminant reduction

Exclusive quick change filter design

Drinking Water System

Drinking Water System

FM DWS 1500 SYSTEM

- Sanitary Quick Change System
 - safe, clean filter replacement eliminates handling filter media
 - as easy to change as a light bulb
- Capable of providing filtered water to multiple water-using appliances
- kitchen and bar sinks, lavatory, hot-water dispensers and refrigerator/icemakers
- The FM DWS 1500 reduces
- sediment
- chlorine taste and odor
- lead

- cyst
- turbidity

Water Cooler	Bottled Water	Pour Through Pitcher	Filter in Faucet	FM DWS 1500
\$1.25 per gallon plus monthly rental fees	\$0.79 to \$1.50 per gallon plus labor and handling	\$0.20 per gallon ¹ plus patience	\$0.18 to \$0.25 per gallon bulky and unsightly	\$0.06 per gallon' Lead and Cyst Protection
Expensive Heavy 5 gallon bottles weigh 40 lbs (18.1 kg). Risk of injury and spills Water delivery — by homeowner or more often by diesel engine (leaded fuel) trucks Storage required for both full and empty bottles Awkward placement. Clash with high-style decorative kitchen designs Often requires electricity Limited usage — not practical for food preparation Cannot supply other water using appliances	Expensive Heavy and cumbersome Difficult to transport Requires frequent trips to market Storage space required Limited usage — not practical for food preparation Cannot supply other water using appliances Bottled water not necessarily "safer" than ordinary tap water' National Resources Defense Council (NRDC)	Frequent filter replacements with yearly costs above \$75 Limited volume — complaints of constant filling which can take up to 20 minutes Pitcher requires continuous cleaning, takes up space on counter or inside refrigerator Limited usage — not practical for food preparation/cooking due to limited capacity Clogs easily — even slower drip filtration plus shorter filter life Cannot supply other water using appliances Cost per gallon based on replacement carridge cost Consumer Reports, Aug 2000	Frequent filter replacements with yearly costs above \$90° Short filter life: 200 gallons (757 liters) Awkward styling: low decorative appeal Lower flow rates (0.5 gpm/1.89 lpm) than faucet mount styles Clogs easily — even slower flow rates with shorter filter life Cannot supply other water using appliances Cost per gallon based on replacement cartridge cost Consumer Reports, Aug 2000	1,500 gallon (5,678 liter) filter life One filter change per year: low maintenance Easy filter replacement: no tools required Separate faucet dispenses filtered water on demand Can service other water usin appliances: refrigerator water/ice, hot water tap, bar sink Lead and cyst reduction health-related claim, verified by third-party regulatory agency Cost per gallon based replacement cartridge cost

Do not use with water that is microbiologically unsafe or of unknown quality without disinfection before

Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.

Visit www.nsf.org for the claims associated with products that are NSF listed.
