Duo-Pak 40™

Extended Surface Self-Seal Two Pocket Filter

Duo-Pak 40 filters are designed for applications where long service life with a medium efficiency filter is required.

The **Duo-Pak 40**, 2 ply configuration, and the benefits of the depth-loading characteristics of 550 media, offers high dust holding capacity and efficiency. The progressive density design of the 550 media is enhanced with a specially formulated tactifier to prevent particle migration and provide exceptional efficiency above five microns.

The **Duo-Pak 40**, 1 ply configuration, which utilizes a tackified single density polyester media, offers an economical alternative for applications where high dust holding capacity in a primary filter is required.

The self-sealing feature of the **Duo-Pak 40** prevents air bypass and eliminates the need for clips; saving time and money during change-outs. The longer service life and low cost make the Duo-Pak 40 an ideal replacement for four-inch, or six-inch pleat applications where holding frames, or flat bank side access housings are in use.

SIZE	Media Sq. Ft.	1 PLY - MERV 7 (Blue & White Media)			2 PLY - MERV 8 (White Media)		
		CFM Capacity @500 CFM	Initial Resistance (w.g.) @300 FPM @500 FPM		CFM Capacity @500 CFM	Initial Resistance (w.g.) @300 FPM @500 FPM
