

# LifeStyle Plus Air Filters Available in 2 Models

**LifeStyle Plus (Model LR)** is designed to meet all current HVAC furnace manufacturer specifications delivering low resistance to air flow, while maintaining good arrestance efficiency. Ideal for heat pumps, sensitive 90+ efficient furnaces and systems with limited air flow. This durable air filter is constructed with a combination of woven polypropylene media supported by unique corrugated steel in a stainless steel frame.

**LifeStyle Plus (Model MF)** offers high efficiency allergy relief, delivering high arrestance efficiency, while maintaining good initial resistance to air flow. This durable air filter is constructed with a combination of woven polypropylene, plus nonwoven polyester for maximum particulate removal, supported by expanded metal and a stainless steel frame.

Model MF		Model LR
90%	Avg. Arrestance Efficiency	74%
123 gm.	Dust Holding Capacity	110 gm.
0.19" w.g.	Initial Air Flow Resistance	0.07" w.g.

Easy to Install!

Easy to Clean!

### LIFETIME WARRANTY

Permatron takes pride in the quality and workmanship of our products. All are built to give years of trouble-free service. Any filter found to be defective in workmanship or materials, when returned to Permatron shipping charges prepaid, will be repaired without charge. The warranty period begins from the date of purchase and does not cover damage caused by excessive heat, disassembly, rough handling or improper installation. DO NOT take the unit apart for cleaning, as this is unnecessary. With proper care and regular cleaning, your Permatron filter should last many years. Permatron Corporation makes no medical or health claims other than that the filter will effectively remove particles from the air. 1-800-882-8012

## There's Air Pollution Inside Your Home!

Common indoor air quality problems can be reduced by the addition of a high quality washable electrostatic air filter to your home's HVAC system. As air is recirculated through the air filter, particles are drawn into the filter media and held until the filter is cleaned monthly. For best air filtration results, your recirculating fan should be running at all times. Enjoy enhanced indoor comfort, maximum performance and keep the HVAC system running clean.
